Dairy Market News is a service provided by the U.S. Department of Agriculture (USDA) and cooperating State agencies under the authority of the Agricultural Marketing Act of 1946. The purpose is to provide dairy farmers and their cooperatives, processors, buyers and sellers of dairy products, and others with information which will help in making buying and selling decisions and future planning.

This is an annual summary of market statistics on dairy products collected and compiled by the Dairy Division of USDA's Agricultural Marketing Service (AMS), and published in "Dairy Market News," a weekly report. This annual summary contains data for 2001. Similar data have been published for the period 1940 through 2000.

In 1981, Congress passed the Agriculture and Food Act of 1981. Section 1121 of the Act authorized USDA to collect reasonable fees to cover the cost of postage, printing, and handling market news reports. A paid subscription system was initiated by AMS on August 1, 1982.

SUMMARY OF DAIRY MARKET NEWS OPERATIONS DURING 2001

Dairy Market News covers markets for dairy products of commercial significance. These include butter, various kinds of cheese, concentrated and dry milk products, and fluid milk and cream. The kinds of market data gathered are determined by industry needs and by the willingness of industry members to voluntarily provide the necessary information. Market news reporters obtain information by telephone, Market News Communication System, fax and e-mail. They use the telephone most extensively in reaching buyers and sellers across the country and around the world.

Dairy Market News also includes related information such as Commodity Credit Corporation purchases, sales, and inventories; invitations and contract awards on dairy products by USDA's Farm Service Agency; import information; and USDA releases on milk and dairy product production, marketings, stocks, prices, and outlook and situation information. A list of the topics of some of the more important related information included in the weekly reports is contained on page 5.

Prices are reported for trucklot or carlot quantities (40,000 to 44,000 pounds); less than trucklot quantities; and tanklot quantities (49,000 pounds). Prices for most products are issued once a week and represent an average value for the entire week. In calculating the monthly average, the weekly price is applied to each workday in the week that is within the month (Saturdays, Sundays, and holidays excluded). This procedure is called time weighting. It is important for months having a split week because it gives the proper weight to the days in each month. No monthly average price is computed if one or more weekly prices are missing.

Monthly averages for prices reported more than once a week are simple averages of all prices reported during the month. Yearly averages are simple averages of the monthly average prices. No yearly average is computed if one or more monthly average prices are missing.

The monthly exchange averages are simple averages of all the closes during the month.

In addition to the printed report, Market News information is carried by news services and by newspapers, radio and television. Information also is available by telephone from Market News reporters. Some information is provided around the clock by recorded telephone messages (608-224-5088). Information is continually available on the Internet at: www.ams.usda.gov/dairy/mncts/index.htm

1/ End of year. The number of markets peaked at 83 in 1962. The number of handlers peaked at 2,314 in 1961.

2/ Average for year. The number of producers peaked at 192,947 in 1961.

3/ Beginning in 1989, due to disadvantageous price situations in some markets, handlers elected not to pool milk that normally would have been associated with the order. This has reduced, sometimes substantially, the volume of producer milk receipts reported for some markets.

4/ Based on blend (uniform) price adjusted for the butterfat content, and in later years, other milk components of producer milk.

1/ These figures are simple averages of monthly prices. The cooperative price represents Class I prices announced for the beginning of the month by cooperative associations in various city markets. The information relates to the major cooperative in each of the city markets and does not apply to all of the Class I sales in these city markets. These data are common market knowledge in the sense that the information represents basic Class I price announcements by the cooperative sent to all handlers who buy milk from them. These announced over-order prices represent charges for various services performed by the cooperative. Announced prices may not include handling or service charges applicable to milk from supply plants. In some instances, the announced over-order prices are not uniform in that competitive credits may be allowed. These prices have not been verified as having been actually paid by handlers. 2/ Data do not include the impact of prices established under the Northeast Dairy Compact.

^{1/} Names in parentheses are the major cities in the principal pricing points of the markets.

^{2/} Due to a disadvantageous relationship between class prices and location adjusted statistical uniform (blend) price in some markets in some months, handlers elected not to pool milk that normally would have been associated with these markets. For 2001, this volume was 3,432 million pounds; for 2000, 3,632 million pounds.

^{3/} Statistical uniform price for component pricing orders (Class III price plus producer price differential). For other orders, uniform skim milk price times 0.965 plus uniform butterfat price times 3.5.

DAIRY MARKET NEWS TERMINOLOGY

Over the years, those engaged in the marketing of dairy products have developed a language peculiar to the trade. Numerous terms and phrases having special meanings are in frequent use. Market reports are intended to convey useful information to readers regarding important phases of a market situation and are best understood by the trade if words and expressions employed are in common usage. The following terms, definitions and abbreviations are used in describing dairy markets and market situations.

AMS - Agricultural Marketing Service: An agency of the U.S. Department of Agriculture. This Agency's responsibilities include administering marketing order programs, standardization, inspection and grading, market news, and the research and promotion programs.

BASIC FORMULA PRICE - BFP: The base month Minnesota-Wisconsin price updated with a butter/powder/cheese formula which established minimum prices for milk under all Federal milk orders. Replaced historic M-W milk price series in May 1995. Discontinued January 2000.

MULTIPLE COMPONENT PRICE - MCP: Class Prices are derived from National Agricultural Statistic Service average monthly weighted prices of NDM, whey, butter, block and barrel cheese. Replaced the Basic Formula Price (BFP) in January 2000.

BULK BUTTER - Packed 68 pounds or 25 KG, net weight, in corrugated boxes.

BUTTERFAT / MILKFAT - The fat portion of whole milk.

CCC - Commodity Credit Corporation: An agency of the U.S. Department of Agriculture. This Agency's responsibilities include conducting price support purchases and related activities, involving expenditures of funds under powers granted by the Congress to CCC. The Secretary of Agriculture and other Department officials serve as officers of the Corporation.

ADJUSTED PURCHASES - Total purchases, contract basis, less/plus contract adjustments.

FISCAL/MARKETING YEAR - October 1 through September 30.

MANUFACTURING ALLOWANCES - CCC's estimate of the average amount per hundredweight needed by plants to cover manufacturing costs (fuel, labor, equipment, packaging, etc.) to convert whole milk into cheese or butter and nonfat dry milk. This allowance is used in determining the CCC purchase price which will enable manufacturers to return to the dairy farmers, on a national average basis, the Government support price. Manufacturing allowances are also used in the calculation of class prices.

MILK EQUIVALENT - The equivalent pounds of whole milk containing a specific percentage of milkfat--usually 3.67 percent--in the production of manufactured dairy products. One method for computing milk equivalent is to multiply the volume of specific manufactured dairy products by a conversion factor derived from the yield of the product from a hundredweight of milk at the specified milkfat percent. CCC does not guarantee that farmers will receive that price.

FAT SOLIDS BASIS: factors used: butter, 21.8; cheese, 9.23; and nonfat dry milk, 0.22.
SKIM SOLIDS BASIS: factors used: butter, 0.12; cheese, 9.9; and nonfat dry milk, 11.64.

NET PURCHASES / REMOVALS - referred to interchangeably as CCC, USDA, or Government removals or net purchases. Surplus milk bought by the CCC under the support price program in the form of butter, cheese, and nonfat dry milk, less sales to the trade for unrestricted use.

PURCHASE PRICES - Announced prices that CCC pays under the price support program for butter, cheese and nonfat dry milk.

REGIONS - East, Midwest, and West. The regions consist of the following states:

EAST - Connecticut, Delaware, Florida, Georgia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Vermont, Virginia, and West Virginia.

WEST - Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

SELLBACK PRICES - The prices determined by CCC at which the government will sell dairy products back to the trade.

RESTRICTED USE - Sales of CCC commodities restricted to a specific use, such as animal feed.

UNRESTRICTED USE - Sales of CCC commodities that may be used for any purpose. These sales are made at both announced and competitive prices.

SUPPORT PRICE FOR MILK - The price set by the Secretary of Agriculture (since October 21, 1981, the support price has been established by Congress) which is in compliance with the requirements of the Agricultural Act of 1949, as amended, for the milk price support program. The support price is a price goal - a national average price for milk of national average milkfat content that USDA hopes to see realized in the marketplace. CCC purchase prices are calculated to provide to milk processors who buy manufacturing grade milk, sufficient revenue to pay producers the support price. CCC does not guarantee that farmers will receive that price.

1/ Prices for all products are issued once a week and represent a value for the entire week. Monthly averages are based on weekly prices and are time-weighted according to the number of workdays in the month - Saturdays, Sundays and National Holidays excluded. No monthly average is computed if one or more weekly prices are missing. * CORRECTION - February's Roller Ground average should have been .2586.

1/ Prices for all products are issued once a week and represent a value for the entire week. Monthly averages are based on weekly prices and are time-weighted according to the number of workdays in the month - Saturdays, Sundays and National Holidays excluded. No monthly average is computed if one or more weekly prices are missing.

* Monthly averages are a simple average of all the closes during the month. Weekly and monthly averages are independent calculations.

** Weekly averages are simple averages of the closes during the calendar week and are for information purposes. Should the

week be split between two months, the weekly average will appear in the monthly report in which the Friday close is reported.

The CME was closed for the July 4th Holiday.

1/ Prices for all products are issued once a week and represent a value for the entire week. Monthly averages are based on weekly prices and are time-weighted according to the number of workdays in the month - Saturdays, Sundays and National Holidays excluded. No monthly average is computed if one or more weekly prices are missing.

1/ Prices for all products are issued once a week and represent a value for the entire week. Monthly averages are based on weekly prices and are time-weighted according to the number of workdays in the month - Saturdays, Sundays and National Holidays excluded. No monthly average is computed if one or more weekly prices are missing.

1/ Prices for all products are issued once a week and represent a value for the entire week. Monthly averages are based on weekly prices and are time-weighted according to the number of workdays in the month - Saturdays, Sundays and National Holidays excluded. No monthly average is computed if one or more weekly prices are missing.

** CORRECTION: The price for Northeast process sliced in report 44 should have been \$1.3825 - 1.6400 and the monthly average should be \$1.7582.

1/ Prices for all products are issued once a week and represent a value for the entire week. Monthly averages are based on weekly prices and are time-weighted according to the number of workdays in the month - Saturdays, Sundays and National Holidays excluded. No monthly average is computed if one or more weekly prices are missing.
